

Non-Profit

Reflective Energy Solutions is very active helping Non-Profits reduce their energy spend by up to 50%!

We understand that Non-Profit organizations may not have the resources to dedicate to energy savings projects, and that is where Reflective Energy Solutions can help you.

Reflective Energy Solutions (RES) works with you to identify low or no-cost opportunities to reduce energy costs and provide new revenue streams helping you protect your budgets from volatile energy market fluctuations.

We do this by helping you buy electricity and natural gas cheaper, use your energy more efficiently, and help you create your own energy on site through Solar Power.

- Buying cheaper electricity and gas is the easiest way to save money on energy. At no cost to you, RES will obtain pricing for you by sending your load profile to our pool of suppliers and run an auction on your behalf. The auction process gets you the best price!

Reflective Energy Solutions works with you to identify low or no-cost opportunities to reduce energy costs and provide new revenue streams helping you protect your budgets from volatile energy market fluctuations.

Buying cheaper electricity and gas is the easiest way to save money on energy.

RES and our partners are experts on the many layers of incentives and rebates that are available to help lower and in many instances, **cover the costs** of energy upgrades and projects.

- For example—Many Non-Profits are acquiring Solar installations via a Power Purchase Agreement or PPA. What is a Power Purchase Agreement? (**No out-of-pocket expenditures, guaranteed savings!**)
- A Power Purchase Agreement (PPA) is an arrangement in which a third-party developer funds, operates, and maintains the Solar system, and a host customer agrees to install the system on its property and purchase the system's energy output from the service provider at a lower rate than the utility.

We have the experience in dealing with the non-profit professional staff as well as board members and clergy. We do all of the heavy lifting to help Non-Profits save real dollars and put those dollars towards more meaningful goals.

We look forward to sharing successful case studies with you that show actual cost savings data from real customers.
